Jay Dave

Software Engineer | Backend & Data Pipelines

Mumbai, Maharashstra | (+91) 8446074260 | jaydave.0835@gmail.com

Objective

Motivated Software Engineer aiming to apply a strong foundation in Python, AWS, and system optimization to solve large-scale engineering problems while gaining intensive experience in building production-grade applications.

Technical Skills

- **Languages**: Python, C++, SQL.
- **Backend & Frameworks:** FastAPI, Flask, React.js, REST APIs.
- **Data & Databases:** MongoDB, WatermelonDB (Offline-first), Redis, Pandas, NumPy.
- **Cloud & DevOps:** AWS (EC2, S3, IAM, Cloud Technical Essentials), Git, Docker, Linux**.**
- **Automation & Tools**: Selenium (Web Scraping), AWS Management Console, Anti-Gravity.

Technical Projects

Metric Fitness Logger | Next.js, FastAPI, MongoDB Atlas, Docker

- Engineered an offline-first PWA using Dockerized MongoDB Atlas for reactive local-to-cloud synchronization, achieving sub-millisecond query speeds for high-volume data.

Linkfluence – Influencer Marketplace | React, Flask, MongoDB Atlas, Docker

- Developed a full-stack discovery engine with Dockerized backend services that automated campaign workflows, reducing manual administrative overhead by 40%.

Additional Projects:

- **YouTube URL Fetcher:** Automated API-driven data pipeline for batch-processing metadata.
- **Image Scraper & Assets Extractor:** Error-resilient Selenium tool for bulk visual data gathering.
- **IBM Stock Dashboard:** Automated data visualization pipeline for market trend analysis.

Education

Bachelor of Science in Information Technology | 2023 – 2026

- Nirmala Memorial Foundation College of Science and Commerce, Mumbai.

Certifications

AWS: Cloud Technical Essentials, Migrating to AWS.

IBM: Machine Learning with Python, Databases and SQL for Data Science, Generative AI Essentials.

Programming: Proficiency in C++ Programming (AICFPT).
